THERAPEUTIC-GRADE ESSENTIAL OILS

TOP 3 SELLING THERAPEUTIC OILS

EUCALYPTUS	Clean, sharp scent helps open nasal passages and clear sinus congestion. Great in massage blends for sore, stiff muscles. Anti-bacterial, anti-viral, anti-fungal.
LAVENDER EXTRA	Great for skin inflammations, dermatitis, eczema, scarring, burns, insect bites and stings. Take several deep sniffs when you can't get to sleep. Calms stormy emotions.
PEPPERMINT	Excellent inhalative for mental fatigue and depression. Relieves headaches, clears the head and freshens the spirit. It eases egotism and false pride while bolstering feeling and confidence. Also keeps mice and spiders away

NEW MEN'S PRODUCTS

All commercially available perfumes are mostly ethyl alcohol, which your body treats like a poison. This is why many people are allergic to perfumes. Alcohol, being a drying agent causes perfume oils to evaporate up to fifteen times more quickly than they would normally and it dries your skin too. This gives the impression that the perfume is stronger than it actually is and the reason the scent is almost gone within a few hours.

Scentually Yours offers pure perfume oils without petroleum carriers, fillers, alcohol or expensive packaging. Pure perfume oils are far more sophisticated, they are long lasting and balanced. They occupy your own private space and leave a gentle trail only where you choose. We are committed to providing the highest quality perfume oils available. Just like jewelry, perfume oils vary tremendously in quality. We have put an enormous amount of effort into selecting the best possible pure oils of every type. We promise you will receive only the best that we can find.

Your natural body heat will cause the scent to gently radiate from you skin. The pulse points: wrists, base of neck and the knees are the best places to apply oils. It will take only 5 minutes for the slow warming scent to begin emitting its full bouquet. It will be smoother, better balanced and well worth the wait.

Our pure perfume oils last for hours on most people, dissipating naturally during the day or evening.

Pure perfume oils will also last in the bottle. Many people are not aware that perfumes with fillers spoil! Pure oils retain their savor year after year. A quarter ounce of our pure perfume oil will last months of daily use. Ounce for ounce, our perfume bottles contain up to twenty times as much pure perfume oil as the typical eau de toilette. Pure perfume oils are an excellent buy. Buy the larger sizes and Save even more!
